Honesty Pledge

Game Theory: Algorithms and Applications
Spring Semester, 2018

I promise, on penalty of failure of CS 539, that all the work I submit will be mine and mine alone. While discussions are allowed, I understand that all submitted work should be independent work.

Any commonality (with an internet source, another student's work, or otherwise) will be considered as plagiarism.

I understand that all resources (references) in print or on the web, aside from the text and class notes, used in solving the homework problems must be explicitly cited.
